

S.03.01 – Off-balance sheet items – General

General comments:

This section relates to annual submission of information for groups.

This template shall include the information referring to off-balance sheet items and the maximum and solvency II value of contingent liabilities in Solvency II balance sheet also. As regards the Solvency II value, the instructions define the items from a recognition perspective. Valuation principles are laid down in Directive 2009/138/EC, Delegated Regulation (EU) 2015/35, Solvency II Technical Standards and Guidelines.

Guarantees require the issuer to make specified payments to reimburse the holder for a loss it incurs if a specified debtor fails to make payment when due under the original or modified terms of a debt instrument. These guarantees can have various legal forms, such as financial guarantees, letters of credit, credit default contracts. These items shall not include guarantees stemming from insurance contracts, which are recognised in technical provisions.

A contingent liability is defined as:

- a. a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or
- b. a present obligation that arises from past events even if:
 - i. it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or
 - ii. the amount of the obligation cannot be measured with sufficient reliability.

Collateral is an asset with a monetary value or a commitment that secure the lender against the defaults of the borrower.

The guarantees listed in this template are not reported in S.03.02 and S.03.03. This means that only limited guarantees are to be reported in this template.

At group level, the template is applicable for all entities within the scope of group supervision – including other financial sectors and non-controlled participations – for method 1 (Accounting consolidation-based method), method 2 (Deduction and aggregation method) and a combination of methods 1 and 2.

For non-controlled participations guarantees provided and guarantees received are included on a proportional basis when method 1 is applied. When method 2 is applied these guarantees are reported with the total amount.

	ITEM	INSTRUCTIONS
C0010/R0010	Maximum value – Guarantees provided by the group, including letters of credit	Sum of all possible cash out-flows related to guarantees if events triggering guarantees were all to happen in relation to guarantees provided by the group to another party. It includes cash-flows related to letter of credit. In case any guarantee is also identified as contingent liability under R0310, the maximum amount shall also be included in this row. Internal guarantees within the scope of group supervision are not reported in this template.
C0010/R0030	Maximum value – Guarantees received by the group, including letters of credit	Sum of all possible cash in-flows related to guarantees if events triggering guarantees were all to happen in relation to guarantees received by the group from another party to guarantee the payment of the liabilities due by the group (includes letter of credit, undrawn committed borrowing facilities). Internal guarantees within the scope of group supervision are not reported in this template.
